

FLAT AND PACK MIX WITH PARBOILED RICE HULLS

PRODUCT DESCRIPTION:

Flat and Pack with Parboiled Rice Hulls is a peat based professional growing media designed for smaller containers and general greenhouse use. A blonde long fiber Sphagnum Peat Moss is utilized to provide moisture retention, and mix structure. Parboiled Rice Hulls replace perlite for a high performing, sustainable, and cost effective blend. Mix is pH buffered with a combination of Dolomitic and High Calcium Lime to ensure proper Ca/Mg balance in the substrate. Starter charge provides up to 2 weeks of crop support. Blue Chip (38-0-0) is included to stabilize the organic matter in blends to prevent any nitrogen immobilization. Flat and Pack mix with Parboiled Rice Hulls is manufactured at optimum moisture content of 50 to 60 percent which will increase the pot per cubic foot yield and positively impact soil structure.
